

PRINTER SPECIFICATIONS

MEDIA

Handling	4 zone vacuum table
Rigid media support	100"x48" & 11 lb/ft ² (254 x 122 cm & 50 Kg/m ²)
Max thickness	4" (10 cm)

PRINT SPEEDS (Vary depending on final configuration)

Maximum speed	1100 ft ² /hr (102 m ² /hr), (34 Boards/hr)**
Production	540 ft ² /hr (50 m ² /hr), (17 Boards/hr)**

PRINTING

Max print resolution	1200 dpi
Drop size	Variable 5, 15 & 30 Picoliter
Margin	Full bleed capable
Printhead	Ricoh Gen5
UV curable lamp type	LED, estimated life 18,000* hrs
Ink type	Sola UV curable ink
Ink capacity	2.5 Liter reservoirs
Connectivity	USB
Supported RIP Software	Caldera / Onyx / SAI

DIMENSIONS

Assembled dimensions (L x W x H)	175" x 80" x 60" (445 x 205 x 153 cm)
Weight assembled (approx)	2650 lb (1202 Kg)
Shipping dimensions (L x W x H)	185" x 90" x 75" (470 x 230 x 191 cm)
Weight shipping (approx)	3310 lb (1502 Kg)

OPERATION CONDITIONS

Temperature	68 to 86 °F (20 to 30 °C)
Humidity	40% to 70% non-condensing
Electrical	220 VAC (± 10%) 50/60 Hz 30A
Warranty	Limited one year parts & labour

SHARK EFB-2512 Rigid/Flexible Substrate Printers

Max versatility

Print the widest variety of rigid and flexible substrates

Increased quality and productivity

Benefit from 1200 dpi grayscale output and feature rich design

Robust design

Experience years of production with confidence

Affordability

Choose the Shark EFB-2512 for its simplicity, affordability and to save money by printing direct to rigids. You have never seen a quality UV curable flatbed so affordable.

With over 20 years in the large and grand format industry, Stratojet began production of world-class large and grand format printing solutions in 2008

*Subject to change without notice.
**Actual results may vary/speeds does not include media setup

SHARK EFB-2512

Configure your printer with the following options:

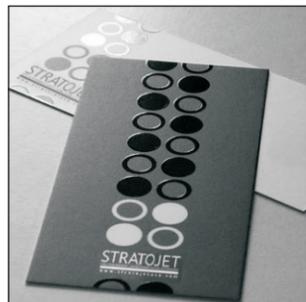

- Single or double white ink
- Single or double varnish (clear coat)
- Add light cyan(LC) and light magenta(LM) ink sets
- ZDep® depth perception printing

QUALITY WITH TECHNOLOGY

With 1200 dpi high definition output Shark EFB-2512 uses grayscale technology to ensure prints have a smooth gradation in skin tones as well as sharp and well saturated solids and text.

Stratojet incorporates Accurate Dot Placement Technology (ADPT). The ADPT integrates the printer controller system for color management software to assign a specific drop size along the print, allowing the user to print sharp text and vibrant colors with speed.

VARNISH / CLEAR (OPTION)

Increase your profit margin by providing high value options like spot varnish coating to highlight specific features on the print, or use complete varnish coat to increase print color protection from harsh external conditions.

Also get the option to add a matte or a gloss varnish affect to your prints.

RICOH PRINTHEAD

The Stratojet's Shark EFB-2512 uses Ricoh's latest printheads, known for its high quality and performance.

Stratojet's variable drop size and grayscale technology allows the user to print in true grayscale variable drop at 5, 10, and 15 picoliter(PL) with printing resolution up to 1200 dpi, and deliver high quality output.

WHITE INK (OPTION)

Shark EFB-2512 offers white ink option allowing you to expand your printing applications using the white ink system to print, under-flood, over-flood or use the spot feature on transparent, translucent or colored materials.

The EFB-2512 circulation system recirculates the white ink, to prevent ink particles from setting. Depending on your needs, we can factory configure your device to print simultaneous CMYK and White printing.

SHARK EFB-2512

Now you can print the highest quality output, eliminate all vinyl cost on rigid jobs, reduce your ink cost and eliminate mounting time and cost.

Choose between different performance levels and speciality options such as white and clear coat/varnish ink options, with confidence.

As your print performance grows, you can also use Stratojet's upgradability feature by adding:

- White ink to print on clear, translucent or colored media
- Clear coat/varnish to highlight or enhance an image
- Add printheads to double the printing speed

Your authorized Stratojet reseller can help you find the right fit for your current and future needs.

ZDep® Printed Depth Perception

Print eye catching output

This option uses patented technology to print depth perception directly on to plain acrylics or glass. The system works combining Stratojet's software, HW, inks and varnish. The specially prepared file is reversed printed and then a spot pattern of micro bubbles is printed on the front side of the substrate. ZDep is NOT lenticular printing, it is better:

- No need to buy expensive lenses, just get acrylic media.
- Easier to set up and never worry about the pitch or alignment or expensive lamination.
- No text size restrictions.
- Print any size up to 4'x8' with consistent results, print after print.
- No 37° to 49° viewing angle restrictions. The product you are selling (printing) can be viewed from any angle 170°.
- You can see the depth perception effect from any angle, looking side to side or up and down.

Stratojet's ZDep gives you a differentiating tool by enabling your company to print eye catching output.

Glass

UV-LED Lamps

Benefit from LED lamps that have exceptional long life and low power consumption. The Shark EFB-2512 UV-LED lamps don't need to warm up and instantly cures ink dry, while generating low heat to allow more print applications that are heat sensitive.

Sharp Text

Never be afraid of printing small text. With the Shark EFB-2512 small picoliter drop size, achieve sharp texts for all of your demanding print jobs.

Unparalleled Support

Built with the highest quality components, our printing solutions are designed from the ground up with serviceability in mind. Should there be a quality or printing problem, our technicians can ask for a temporary password to log in to your printer, then read, evaluate the log files and find most printer related issues remotely.

Our expertise comes from understanding on how a printer service provider works. We found the majority of service calls are due to application problems, to solve such issues, in Stratojet we start by training our technicians to be application experts before they can become a HW technician.

Limitless Application

Print on virtually any rigid media up to 4" (10 cm) thick and offer your customers durable speciality printed gifts/novelties, POP displays, proofs/mock-ups, packaging, glass, ceramic tiles, aluminum composite sheets wooden blocks, phone covers and many more.

Built-in Anti-static Bar

Depending on the media, static can cause quality problems; to minimize these issues, anti static bar is built in the printer carriage.

Robust Design

To increase reliability, Stratojet uses servo motors instead of using significantly inexpensive DC motors. To ensure fidelity across the image, particularly when working on tile applications, Stratojet chose an ink delivery system that pulls the ink with vacuum, instead of a less efficient positive pressure system.

Contact an authorized reseller to demonstrate with detail the quality and reliability of Stratojet's Shark EFB-2512.
